

# CITY CROWDED

## THOUSANDS OF VISITORS

Thousands of People Await the Arrival of the Fleet at San Diego.

STREETS A MASS OF COLOR

WARSHIPS WILL CAST ANCHOR EARLY THIS AFTERNOON.

San Diego, Cal., April 13.—Fete days for the American battleship fleet will begin tomorrow afternoon, when the sixteen armored cruisers of the navy's most notable cruise cast anchor in the waters of the Pacific off Coronado Beach, two miles from San Diego as the crow flies.

San Diego is crowded with visitors and sightseers, and there before the eyes of the city are such an elaborate decoration of streets and buildings. By day the broad thoroughfares are a mass of waving colors, the red, white and blue of the nation being mingled with the yellow and white, typifying the golden state of California. Triumphant arches have been erected at many of the street intersections, and immense signs that burn the hospitable word "Welcome" through the darkness of the night are among the many features of the elaborate scheme of decoration.

### Governor on Hand.

Governor J. N. Gillett of California, accompanied by his staff and a distinguished party of guests, arrived tonight in three special cars. Governor Gillett arose from a sickbed in San Francisco to come here, where the official welcome of the state is to be extended. The governor was still quite ill tonight, but expressed the hope that he would be much improved tomorrow by a good night's rest. If well enough he will go out to the Connecticut tomorrow afternoon at 4 o'clock to pay his respects to Rear Admiral Charles M. Thomas, the senior officer in command. Late in the afternoon Admiral Thomas will return the governor's visit at the Hotel Del Coronado.

A feature of tomorrow's program which will undoubtedly prove enjoyable to the men of the fleet will be the distribution during the afternoon of thousands of oranges, the largest grown in this section of the state. This part of the welcome is truly Californian.

### Will Anchor at 1 P. M.

The fleet will cast anchor at 1 p. m. tomorrow and will remain here until Saturday morning at 8 o'clock, when it will proceed to the port of Los Angeles. The battleships were only 100 miles to the south, according to wireless information received last night, and were steaming in "line of squadron," or two long lines of eight vessels each. They were speeding at nine knots an hour. This rate will probably be reduced during the forenoon tomorrow so as not to bring the ships too close to the Coronado anchorage before the appointed hour.

Many thousands of people will make the short journey across San Diego bay to Coronado Beach to witness the arrival of the sixteen ships. It is expected that the double column formation will be maintained until Coronado is sighted, when there will be a maneuver to lines of direction, bringing the fleet to anchor in four lines of four ships each.

### Payday on the Warships.

Today was pay day on all of the vessels, the crews receiving their monthly allowances in gold.

Tomorrow's program consists of an exchange of courtesies between the state and city authorities and the flag officers of the fleet, the distribution of oranges on all sixteen of the vessels, a private banquet to Rear Admiral Thomas and the other flag and commanding officers in the harbor, the illumination of the ships with thousands of incandescent bulbs, a searchlight drill during the early evening, and the continual burning of red signal fires along the Coronado shore.

### Will Take Testimony.

New York, April 13.—Joshiah Cohen of Pittsburgh today was appointed commissioner to take the testimony of seven Pittsburgh witnesses in the suit for the annulment of the marriage which Evelyn Nesbit Thaw has instituted against Harry K. Thaw.

Assessment No. 31.

WARAB MINING COMPANY, principal place of business, Salt Lake City, Utah.  
Notice is hereby given that at a meeting of the board of directors, held on the 9th day of April, 1908, an assessment of ten (10) cents per share was levied on the capital stock of the corporation, payable on or before the 9th day of May, 1908, to W. Mont Perry, secretary, at room 529 Atlas block, West Second South street, Salt Lake City, Utah. Any stock upon which this assessment may remain unpaid on the 9th day of May, 1908, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on the 1st day of June, 1908, to pay the delinquent assessment, together with the cost of advertising and expense of sale.

W. MONT PERRY, Secretary.  
Location of offices, Nos. 529-532 Atlas block, Salt Lake City, Utah.

**The Rayol Lamp**  
Unequaled for its bright and steady light, simple construction and absolute safety. Has latest improved burner. Made of brass throughout and nickel plated. Every lamp warranted. Write to nearest agency if not at your dealer's.

## Crime Breeds Crime: A Western Tale

(Philadelphia Ledger.)

Sometimes the story of a crime is so markedly unique and the links of the chain stretch over so long a period that it becomes more than the mere record of tragedy. It may be that the criminal has been born under a shadow or with poison in his moral blood. Then the question arises if he is not to be pitied; whether he can be considered culpable in the full sense, or has been the victim of circumstances grim and inexorable.

Several such cases are on record in Utah. One of these was a case of a man who was wounded and captured almost immediately. The simple narrative of the hapless felon's life, showing his genesis and environment, affords material for the student of criminology. To be complete it must begin as far back as 1872 and even then there must have been at work dire and subtle influences, the history of which has been told.

### Lloyd Majors Appears.

In the year mentioned Lloyd Majors appeared in San Jose, Cal., a man of a forbidding mien, by occupation a wheelwright. He possessed a fair education, took an interest in church work and joined a political club. In argument upon political subjects he displayed an ugly temper. Majors fell into disrepute not by reason of his temper, however, but because of the tendency of his little shop to be destroyed by fire. This had happened three times. When at last the companies refused to place any more insurance Majors habitually abandoned decent associations, and moving to the neighboring town of Los Gatos, opened a saloon.

### Burned by Assassins.

One night the glare of a fire was noticed in the nearby mountains. The next morning revealed that this had been caused by the burning of the cabin of an old mountaineer named Renowden. Outside the cabin of fire, burned through the breast, was the body of Renowden. Inside the ruins was the trunk and head of a man, quickly identified as a neighboring man, who had been in the habit of exchanging visits. In the heart of the body was a bullet that fitted the wound carried by Showers, this fact not being discovered until long afterward when the body was taken to the morgue.

The evening of the fire, but hours before the blaze had been lighted, two men were recognized as Jewell and Showers. The next morning the pair had disappeared. Majors was doing business as usual. Showers was excited by the absence; pursuit made, and both were captured, but only after a desperate resistance. Another incident showed an interest was that the night of the crime a horse owned by Majors had been out of the livery stable and had been ridden by a ranchman remembered to have heard of the murder of Renowden. The horse was seen galloping fast toward the canyon leading to the Renowden home, and an hour later the sound of a rifle under arrest and put on trial with the others.

### The Miscreants Convicted.

Showers took the stand and made a full confession. He said that the job had been done by Majors, but was for robbery and not murder. Jewell, a milder old man, had money, and went prepared to exact it from him by torture, the pinches and tortures he carried for this being displayed in court.

All were found guilty. Jewell was sentenced to the state prison for life, and defiant to the last. Showers got life imprisonment, and a similar fate was meted out to the other two. The community was indignant, and demands for the latter be tried again, this time for the murder of Renowden. He had originated the plot, had lured the pair to the spot, and had taken that awful midnight ride to destroy the evidence.

## MINERAL OR NON-MINERAL

Dispute Over Classification of Lands in Northern Pacific Grant in Idaho and Montana.

Helena, Mont., April 13.—In compliance with the request of the Montana Mining association, through its representatives sent to Washington to influence President Roosevelt, Secretary Garfield and others, the interior department has begun an investigation into the mineral and non-mineral classification of lands included in Northern Pacific land grants in Montana and Idaho.

Land Commissioner Denett assigned Chief of Field Service Schwartz to the task, and for two weeks he has been mapping out plans for a thorough investigation into each and every complaint. Today it was announced that field work would be placed in charge of L. L. Sharp of Helena.

The Northern Pacific has also filed several protests, and the work will be investigated. The railroad alleges that a strip of land ten miles wide and twenty-four miles long near the north fork of the Clearwater in Idaho has been classified as mineral, when in fact it is not mineralized. The same allegation is made in reference to large tracts in the Bitter Root and Cascade ranges in Montana.

Mr. Schwartz said that many complaints had been filed wherein it had been alleged that the railroad had secured much valuable timber and mineral lands under improper classification.

### WILL ADJOURN MAY 9.

Program of Congress Will Be Arranged Accordingly.  
Washington, April 13.—After a brief conference with President Roosevelt today, Representative Watson of Indiana, the Republican "whip" of the house, said that he has made an appointment for tomorrow night to discuss with the president the program of legislation for the remainder of the session. Mr. Watson has in mind a plan for adjourning May 9, understood to have been formulated by Republican leaders in congress. The discussion tomorrow night will embrace all of the features of this plan, and President Roosevelt will undoubtedly make known his desires on this subject.

### JAKE HOLDS HIS JOB.

Washington, April 13.—The president today nominated Jacob J. Greenwald of Utah to be surveyor in charge of the northern division of the Salt Lake City.

### METEOROLOGICAL REPORT.

Temperature at 6 p. m., 76; maximum temperature, 78; minimum temperature, 52; mean temperature, 66, which is 18 degrees above normal; total precipitation since last of the month, 15; accumulated excess of temperature since Jan. 1, 108 degrees. Total precipitation since last of the month, 30 inch, which is 67 inch below normal; accumulated deficiency since Jan. 1, 1.71 inch. Relative humidity at 6 p. m., 18 per cent.

## AMENDMENTS TO THE NAVAL BILL

Some Ruled Out on Points of Order and Others Voted Down.

CONTROVERSY IS REVIVED

DISCUSSION OF FORTIFICATIONS IN THE PHILIPPINES.

Washington, April 13.—Consideration of the naval appropriation bill was resumed in the house today. General debate having been concluded Saturday, the reading of the amendments was begun. No sooner was this done than Mr. Hobson (Ala.) offered an amendment appropriating \$100,000 for promoting the cause of international arbitration, the sum to be expended by the executive committee of the American group of the Interparliamentary union.

Mr. Hobson and Mr. Bartholdt (Mo.) could realize the sum to be expended by the executive committee of the American group of the Interparliamentary union. On a point of order by Mr. Foss (Ill.) it was ruled out as not being germane to the bill.

An amendment by Mr. Foss to increase the pay of the officers of the navy and marine corps, and one by Mr. Bartholdt prohibiting naval or marine bands from accepting private employment for pay were ruled out upon points of order.

### Victory for Powder Trust.

The house voted down an amendment by Mr. Hitchcock (Neb.) limiting to 50 cents a pound the price at which powder shall be sold to the government. The present price is 57 cents, and it was disclosed that the government produced it for 47 cents.

Mr. Foss declared that because of the fact that the government now manufactured one-third of the powder used by it, it practically controlled the situation and was in a position whereby appropriations for the plants could be increased and the government make all the powder needed by it.

When the provision relating to the naval station at Olongapo, Philippine Islands, was reached, the old controversy over the fortifications of Subig and Manila bays cropped out. Mr. Hobson declared that any one who would choose between the two would not choose Manila bays.

The whole question, he said, was simply one of defense. "We cannot hold Subig bay ten days," he said; "we can hold Manila bay ninety days." The only way to hold the islands at all, he asserted, was to control the sea. At present the United States had only temporary control. He contended that an army from Asia could land and take Subig bay from the rear, withdraw its resistance and then proceed and carry Manila city and Manila bay.

### Revenge on Informer.

And so he did. Procuring a file, he sharpened it into a deadly blade, and meeting the fellow convict he had learned to regard as the prime cause of his trouble, he plunged the steel into him again and again. The law took no cognizance of his motives. There was not any plea of emergency. The man was a malingerer and in due time Putnam dropped through the trap, his life sentence ended.

Thus to a crime of robbery, planned in the 20's may be directly traced eight deaths by violence. Four men were murdered, three legally executed and one died in prison. What a malign force was Lloyd Majors, the wheelwright! And it must not be forgotten that in the Utah penitentiary he required five days of police to restrain the sin of his father; while, sadder, perhaps, than all, there is somewhere, crushed and broken hearted, a woman who has been a mother, a wife, a sister, and who must mourn with equal grief her living and her dead.

## CURBING THE PRITCHARDS

Senate Judiciary Committee Reports a Bill Regulating Granting of Injunctions.

Washington, April 13.—Through Senator Overman, the senate committee on judiciary today favorably reported a bill regulating the practice of granting injunctions by United States courts restraining the enforcement of state statutes. The bill provides that no circuit or district court shall issue such temporary injunctions on the ground of unconstitutionality until testimony shall have been taken by three judges, at least two of whom shall be circuit judges.

The bill also provides for a direct appeal of such cases to the supreme court of the United States, and gives them precedence there. It is intended to meet conditions such as have recently arisen in Minnesota, North Carolina and other states.

No one is immune from kidney trouble, so just remember that Foley's Kidney Cure will cure the irregularities and any case of kidney and bladder trouble that is not beyond the reach of medicine. F. H. Hill Drug Co., "The Never Substitutes."

### WEIGHT HITS GROUND KEEPER.

Philadelphia, April 13.—William Renwick, popularly known as "Scotty," the groundskeeper at the University of Pennsylvania, was struck on the head by a sixteen-pound hammer at Franklin field today and probably fatally injured. Daniel F. Luby of Peabody, Mass., threw the hammer down the field toward "Scotty," who either did not see the throw or lost sight of the weight in the sun.

### HEALS

### GOLD SORES

The deep, underlying cause of every old sore is a bad condition of the blood. This vital fluid has become infected with some germ or poison which prevents the place from healing. This infection may be the result of an inactive, sluggish condition of the system leaving the refuse matter in the body to be absorbed into the circulation instead of throwing it off through the usual channels of nature. Another cause is the weakening or polluting of this life-stream from hereditary taints, or from the effects of a long spell of sickness, leaving disease germs in the system. When the blood is in this condition a sore cannot heal because the impurities with which the circulation is filled are being constantly discharged into the place to irritate and inflame the tissues and further disease the surrounding flesh. The only treatment that can do any good is one that removes the cause, and for this purpose nothing equals S. S. S. It begins at the fountain head of the trouble and drives out all germs, impurities and poisons, and then the place, being supplied with rich, pure blood, heals naturally and permanently. Local applications assist in cleansing the place, but a cure can only be effected through a purification of the blood. Book on Sores and Ulcers and any medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

## Count the Cream

You would all eat Mapl-Flake if it cost 10 cents per package. You would all want our maple flavor—our perfect cooking—were it not for that five-cent difference.

But what if **Mapl-Flake** is 15 cents? Figure the whole cost—the food and the cream together. Cream costs as much on poor food as on good food. See how little you save.

You want Mapl-Flake because it tastes best. But that is of least importance. The vital fact is that **Mapl-Flake** is cooked best. Our process requires 96 hours.

That is four times as long as it need take—four times as long as it does take some others. There is where our extra cost comes in.

But all of the wheat is thus made digestible. By a shorter process it is not. Starch, to be digestible, must be made soluble. The particles must be separated for the digestive juices. That requires proper cooking.

So our wheat is steam-cooked for six hours, then cured, then flaked, then toasted 30 minutes at 400 degrees.

That process is expensive, but it is necessary, else we would not employ it. For without it we could give you Mapl-Flake at 10 cents.

Isn't it better to have a food that's all food, because every whit digests? Isn't it even more economical?

We boil our wheat in pure maple syrup—the source of our delicious flavor. That is less important to you, perhaps, than it is to a child. It induces a child to like the food that is best for it.

Wheat is the perfect food—Mapl-Flake is perfect form. But the deciding point with a child, you'll find, is the maple sugar flavor.

The only food served in individual packages in hotels, clubs, cafes, and on dining cars.

**Mapl-Flake**

## How Harsh Physic Wrecks the Bowels

Irritate the skin in any spot frequently and that spot will grow calloused. That is Nature's means of protection. So with the bowels. When you irritate the lining with salts or "pills," the lining grows hard.

That so retards the natural bowel action that you come to need physic constantly. And you need a constantly larger dose because of the calloused bowels. You have the "physic habit."

Cascarets bring the same results gently and naturally—without irritation. They restore the natural bowel functions, so you don't need them long. And the dose never needs increasing. Their effect is the same as the effect of laxative foods—or of exercise.

**Cascarets**  
The vest-pocket box is 10 cents. The month-treatment box 50 cents. 12,000,000 boxes sold annually.

### Beer as a Temperance Beverage

Conservative temperance workers recognize beer as a temperance drink. It contains such a small percentage of alcohol that it cannot cause intoxication in itself, unless an unreasonably excessive quantity is used at one time. Even then, the result is likely to be less of intoxication than of acute illness, caused by the overloading of the stomach, as in overeating.

The alcoholic strength of Fisher beer is less than 4 per cent. It contains less alcohol than hard cider, less in proportion than any wine, and, in fact, many of the so-called "soft drinks."

We make these statements, not by way of apologizing for the presence of alcohol in our beer, but to counteract a possible false impression in the minds of some. The alcohol contained in Fisher beer constitutes a useful part. It adds to its nutritive value, aids digestion and is altogether beneficial.
